Greg is the manager of the Analytical and Environmental Chemistry Product Line for Battelle, the worlds largest independent Research and Development company. He manages 214 chemists, technicians, and support staff Columbus Ohio; Aberdeen Maryland; Atlanta, Georgia; Duxbury, Massachusetts; and Geneva, Switzerland. His Product Line conducts research and development of specialized chemical analysis methodologies and instrumentation for clients worldwide. The group also performs trace level chemical analyses; custom organic chemical syntheses of specialized compounds; and forensic analyses to identify the unknown compounds present in samples. Greg has also held positions as section manager, program manager, and research scientist at Battelle. Prior to joining Battelle, Greg served in the US Army as a Chemical Corps Officer. He has a B.S. in Chemistry from Syracuse University and an M.S. in Environmental Science from The Ohio State University. .

Greg currently is President of the Board of Directors for ALMA, the Association of Laboratory Managers, an international professional group focused on peer interactions and development of laboratory managers.
